FLUID & METERING

STRATUS PRO QUICK START GUIDE

Step 1: Attach handle to the back of the cart with the two screws and lock-washers provided.

Step 2: Remove lid and fill solution tank with diluted chemical (tank holds 2.8 gallons).

Step 3: Plug power cord into a suitable power source that is properly grounded.

Step 4: Turn main power switch on base unit ON.

Step 5: Press green rocker switch on spray nozzle to the ON position.

Step 6: Hold down the PRIME button for about 25 seconds until the liquid solution reaches the spray nozzle. Hold longer if spray is uneven.

Step 7: For complete wrapping of the sprayed solution, press the CHARGE button to ON.

Step 8: When finished, open the valve at the rear of the unit to drain and flush the solution tank.

Step 9: Wrap the power cord around the holder on the back of the cart for transporting unit.

Step 10: Hang the sprayer on the hook provided on the handle. Quick start is now complete.

- Prior to handling any chemicals, consult the manufacturers SDS and the label instructions on the container for proper PPE, handling instructions, application limitations, and proper dilution.
- For detailed instructions on operation, safety, and additional user content, consult the instruction manual provided with the unit.
